PROFILE

Computer Engineering graduate skilled in Python full-stack development (Django, DRF, JWT, React). Built scalable projects including real-time chat, music streaming, and AI-powered ticketing systems. Passionate about backend development, cybersecurity, and AI-driven applications.

EDUCATION

INDALA COLLEGE OF ENGINEERING

- Bachelor of computer Engineering

ACHIEVERS COLLEGE (HSC)

- 65.17%

PATIL BAL MANDIR (SSC)

- 83.80%

SKILLS

- HTML
- CSS
- Javascript
- Djaango, Django Rest Framework
- React.js
- Data Structres
- Python
- C, C++
- Cloud Computing
- T-kinter GUI
- MYSQL
- PostgreSQL
- Tailwind CSS

PROJECTS

Resso music app clone

- Built full-stack music streaming application using Django REST Framework with secure APIs for music upload, streaming, and management
- Implemented JWT authentication with access/refresh tokens, blacklist support, and email & phone OTP verification.
- Integrated Cloudinary for scalable media storage and configured CORS for frontend connectivity.

Chat web app

- Built real-time chat application using Django and Daphne (ASGI) with WebSocket messaging.
- Implemented secure authentication using Django Allauth.
- Improved UI performance with django-htmx for dynamic updates and django-cleanup for automated media management.

TickitZila

- Built Django REST Framework APIs with JWT authentication, PostgreSQL, and RBAC (3 roles). Implemented payments, email verification, and file uploads. Developed React.
- web app (Tailwind CSS, dynamic themes) and React Native mobile app with Firebase push notifications, offline drafting, and biometric login.
- Created AI/ML discount prediction model saving users 20-40%. Added women safety (SOS alert), snack ordering, and real-time ticket tracking.

Mini projects

- E-commerce CRUD App - Full CRUD operations for product management with database integration
- Jarvis Voice Assistant - Voice-controlled assistant using Python and PyAudio for speech recognition and automated tasks

LANGUAGES

- English
- Marathi
- Hindi

EXPERIANCE

Heuristic Technopark (Python Full-Stack Intern)

Worked on Python full-stack projects during 6-month internship program
Received "Best Performer" award

First-buy . com

Developed responsive user interfaces using Tailwind CSS • Created user-friendly interactive UI with responsive design
