PROFILE

Motivated Computer Engineering student with strong hands-on experience in Python full-stack web development, specializing in Django, REST APIs, JWT authentication, and real-time applications. Proven ability to build scalable projects including chat systems, music streaming platforms, and voice-based assistants. Skilled in Python, JavaScript, React, MySQL, and cloud integrations, with a strong interest in backend development, cybersecurity, and AI-driven applications.

EDUCATION

INDALA COLLEGE OF ENGINEERING

- Bachelor of computer Engineering

ACHIEVERS COLLEGE (HSC)

- 65.17%

PATIL BAL MANDIR (SSC)

- 83.80%

SKILLS

- HTML
- CSS
- Javascript
- Django, Django REST Framework
- React.js
- Data Structures
- Python
- C,C++
- Cloud Computing
- Tkinter GUI
- MYSQL
- Tailwind CSS

PROJECTS

Chat web app

- Built a real-time chat application using Django and Daphne (ASGI) with WebSocket-based messaging.
- Implemented secure authentication and user management using Django Allauth with session handling.
- Improved UI performance with django-htmx for dynamic updates and django-cleanup for automated media management.

Resso music app clone

- Built a full-stack Music Streaming Application using Django REST Framework with secure APIs for music upload, streaming, and management.
- Implemented JWT authentication with access/refresh tokens, blacklist support, and Email & Phone OTP verification for secure user access.
- Integrated Cloudinary for scalable media storage, configured CORS for frontend connectivity, and followed a modular app structure (user, music).

Mini projects

- **Basic Calculator (Tkinter, Python):** Created a GUI-based calculator using Tkinter, implementing arithmetic operations with event handling and input validation.
- **E-commerce Web Application (CRUD):** Developed a basic e-commerce website implementing Create, Read, Update, Delete (CRUD) operations for products using backend database integration.
- **Shinchan Run Game (JavaScript):** Designed a browser-based endless runner game using HTML, CSS, and JavaScript, featuring character animation, obstacle handling, and score tracking.
- **Python Jarvis Voice Assistant (PyAudio):** Implemented a voice-controlled assistant using Python and PyAudio, capable of recognizing voice commands and performing automated tasks.

LANGUAGES

- English
- Marathi
- Hindi

EXPERIENCE

- **First-buy.com (Intern)**
worked in front end parts made user friendly interactive UI using tailwind CSS with responsive UI
